Hepaxan

Protector and Stimulator
of Liver Function

Protector and Stimulator of Liver Function

Hepaxan is formulated with thioctic acid, acetylmethionine, and vitamin B12 — a combination designed to **protect and stimulate liver activity**, **reduce the risk of hyperketonemia/hepatic lipidosis**, and **accelerate recovery** in animals under metabolic stress, intoxications, or infections associated with liver dysfunction.

ADVANTAGES

Antioxidant, essential amino acid, and vitamin-based

Stimulates energy metabolism

Reduces recovery time and increases productivity

Excellent syringeability and easy application

Can be used alone or in combination with other products

No withdrawal period

Approved for all domestic species

Hepaxan protects and stimulates liver function. Indicated for the treatment of ketosis, hepatitis, liver insufficiencies, and as a hepatic detoxifier.

Hepaxan
